

SPECIMEN 06

// R&D

FROM OPERATIONAL CHALLENGES TO TECHNICAL SOLUTIONS

SPECIAL SOLUTIONS & PROTOTYPES

Development of customised UAV systems, components and prototypes based on specific operational requirements.

CO-CREATION WITH USERS

Close collaboration with operators and end users to ensure solutions meet real operational needs.

FIELD & LIVE TESTING

Validation of technologies under realistic conditions to evaluate performance and operational suitability.

SYSTEM INTEGRATION

Integration of newly developed or adapted technologies into existing platforms and operational environments.
