

SPECIMEN 01

// UXS

UNMANNED SYSTEMS TAILORED TO OPERATIONAL REQUIREMENTS

TACTICAL UAS

Unmanned aerial systems designed for flexible deployment in tactical environments.

FPV SYSTEMS

Customizable FPV solutions for modern operational requirements.

GROUND ROBOTICS

Unmanned ground systems for specialized operational scenarios.

ISR & PAYLOAD INTEGRATION

Mission-specific configurations combining platforms with advanced sensors and payloads.

TETHERED SYSTEMS

Persistent unmanned solutions for continuous surveillance and monitoring.

INTEGRATED MISSION SYSTEMS

Combining unmanned platforms, communication systems and software into complete operational solutions.
